

September 30, 2009

Dear Dr. Kearns,

I must tell you some great news. When I first started with you I told you that I had been having an on going problem with my hands. They would start to cramp up and my fingers would start to tremble and come together. For example, when I would hold tools, like a hammer, I had to pry my hands open in order to get the hammer out of my hands. The same was true with trying to pick up small objects like a penny. My hands would cramp and I couldn't pick the penny up. Driving a car was worse; my hands would lock around the steering wheel. My hands literally were controlling themselves. My problem also was getting worse with these occurrences happening much more frequently. I would have this problem at first every few days till it reaches several times a day before I saw you.

The problem all started when I had a major car accident back in April of 2005. I was at a complete stop and was rear ended totaling my car. I had been to many doctors as well as, chiropractors who tried everything including brain scans and could find nothing wrong.

That was until I stopped by for my first and only visit with you on this problem. You worked only on my hands and arms for about a half and hour or more, that was it. Since that day of August 17, 2009 I have never had a problem since! I drive, hammer, and pickup as many small objects as I please.

Peg Bowman from Sacred Heart Parish in Marengo had told me to try you. She said that she strongly recommended you.. She didn't tell me that you also preformed miracles. Thank you doctor for using your God given talent so well!

Your loyal new patient,
